

**Lighting  
Without Limits**

## **ABOUT US**

---

Since its founding in 1940, Day-O-Lite has remained a family owned business with a commitment to excellence. Our fierce independence has made it possible for Day-O-Lite to provide exceptional, personalized customer service and Made-in-the-USA quality from our sustainable Warwick, RI facility. Contact us today to experience the distinct difference only Day-O-Lite's knowledgeable and enthusiastic team of industry professionals can deliver.

### **Why Dayolite?**

- Personalized customer service. Call us and speak directly to our team.
- Rapid Ship, DLC and Smart Lighting solutions at competitive market pricing.
- Custom luminaires, patterns and finish capabilities, even in small quantities.
- 100% designed, fabricated and assembled in Warwick, RI - Made in USA.
- Innovative design assistance for standard and custom solutions.

### **Custom Capabilities**

Day-O-Lite's value-added range of customization services includes variants of standard product and complete custom design and fabrication. Our goal is to provide value-added customization services through advanced design, engineering and manufacturing technologies.

Contact Day-O-Lite today with your custom luminaire requirements. Our helpful team will walk you through our process. From there we design, build and finish your unique luminaire to your custom specifications.

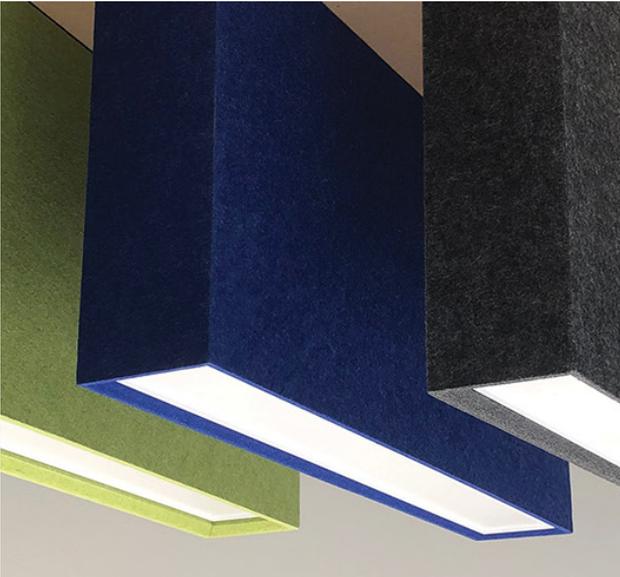

- Variants of standard products and completely custom products.
- Custom finishes in any color; antimicrobial finishes for healthcare applications.
- Custom linear patterns and transitions; suspended to recessed, wall to ceiling.
- High quality, exceptional customer service and quick turnaround times.
- Rapid prototyping capabilities for fast concept evaluation and approval.

## SMART LIGHTING

---

Smart Lighting offers energy savings and building code compliance for today's architectural applications by combining controls, sensors, color tuning, optics, and emergency technology. Day-O-Lite's Smart Lighting approach delivers lighting systems that are efficient, intelligent and control enabled.

- Title-24 compliant LED and driver solutions.
- Occupancy and daylight harvesting sensors.
- Advanced wired and wireless network control.
- Integrated emergency battery back-up.

## ACOUSTIC SOLUTIONS

---

Day-O-Lite's acoustic options integrate energy efficient architectural luminaires with advanced sound absorbing technology in a sustainable, eco-friendly solution. Day-O-Lite's acoustic solutions are ideal for use in educational facilities, office spaces, commercial, theatre and healthcare applications.

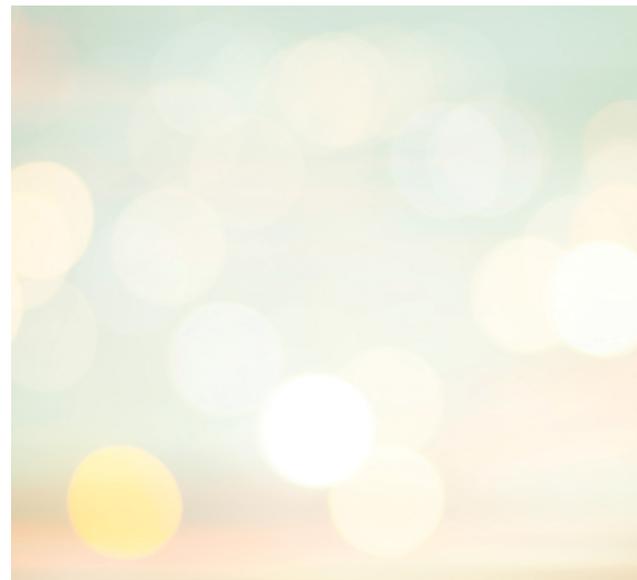

- Compatible with PROFILE 14/24/44 and Trilogy series.
- 20 unique colors in panel heights of 8", 12" and 16".
- Apparent NRC (noise reduction coefficient) of 1.60.
- 100% recyclable, stain-resistant polyester material.

## TUNABLE WHITE & COLOR

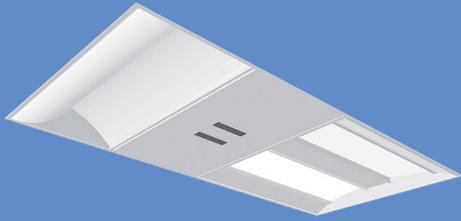

---

Research has shown that human wellbeing, productivity and health may be improved through the application of interior lighting that mimics natural daylight. Day-O-Lite offers a range of human-centric lighting options for a variety of applications and budgets; bringing the benefits of natural light indoors.

- 2 channel, 2700K-6500K w/0-10V control.
- 3 channel improved color accuracy w/DLM.
- 5 channel tunable color, 1650K-8000K, 92CRI.
- RGB, RGB/W and RGB/WW w/DMX control.

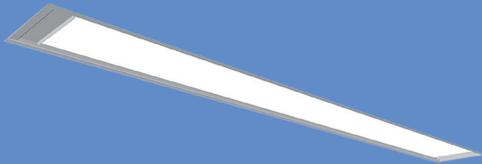

# HEALTHCARE

## MEDL-MF Multi-Function

Exam, ambient, reading and night/nurses' light functions combined into a single 2x4 luminaire. MEDL-MF offers versatility combined with low maintenance and superior energy efficiency in patient rooms.

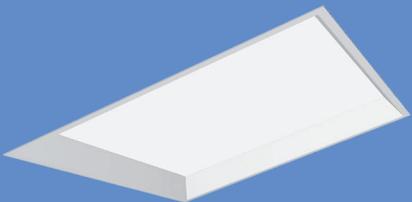

## MEDL-EA Exam/Ambient

Dual function luminaire provides exam and ambient lighting separately or simultaneously. Installs in pairs on either side of the patient bed in both recessed and ceiling-surface applications.

## MEDL-PL Patient Light

Patient headwall-mounted bed light with both direct and indirect distribution is ideal for general ambient illumination and in-bed reading/task lighting. Patient controllable through bed-mount pillow switch.

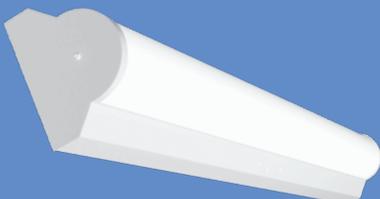

## SKYLITE Regressed Troffer

SKL features a highly diffuse acrylic lens, regressed 2" by a decorative aluminum trim for a classic skylight appearance. Ideal for use with decorative overlays in patient rooms, or simple white light.

## NASL-2062 Zero-Plenum DLC

At less than 2" in depth the NASL-2062 is the ideal luminaire for healthcare and commercial applications with space-restricted or zero-plenum ceiling cavities. Fits flush within standard ceiling grids.

## STAIRWELL Egress Lighting

Designed for healthcare and commercial stairwell applications. Integral occupancy sensor automatically adjusts output in either on/off or step-dim (50%/100%) configurations.

# RECESSED

## **HARMONY High Performance DLC**

Contemporary styling and versatile optics make the Harmony series an ideal solution for office, educational and healthcare applications. Day-O-Lite's most efficient lensed troffer.

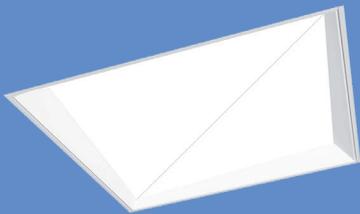

---

## **AFFINITY Adjustable Lens**

Affinity's diffuse box lens is adjustable in 1/2" increments from ceiling-flush to 7" ceiling-drop. Arrange multiple individual or clustered fixtures with staggered drops for a truly unique installation.

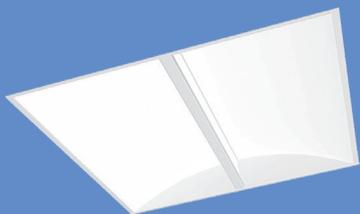

---

## **CAMEO Deco-Lens**

A folded lens reminiscent of origami makes Cameo ideal for lensed-troffer applications requiring a unique look. Available in 1x1 and 2x2, combine Cameo with tunable white and tunable color options.

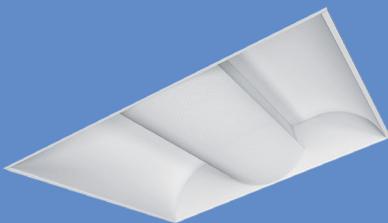

---

## **SKYBLADE Edge-Lit**

An edge-lit clear acrylic blade bisects the concave troffer housing delivering plentiful illumination from a unique form-factor. Exceptionally smooth, semi-indirect output softly illuminates without shadows.

---

## **NASL-PIW Volumetric Basket**

A volumetric recessed basket for general lighting applications. NASL-PIW is well suited in office and educational applications requiring softer, semi-indirect illumination from a familiar form factor.

---

## **NASL-RND Recessed Round**

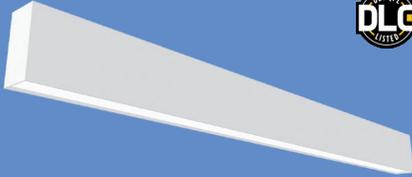

In 2', 3' and 4' diameters NASL-RND makes a statement with recessed clouds of light. Ideal for general illumination where round ceiling elements are desired. Matches Equator or Compass diameters.

# LINEAR | PERIMETER

## PROFILE Extruded Linear

Profile is Day-O-Lite's premier extruded linear offering. May be recessed, suspended or wall mounted. LED-optimized diffusers and asymmetrical, bat-wing and collimating lenses in three distributions.

## ARC Custom Radius

Create an infinite variety of curved suspended or recessed patterns with Day-O-Lite's extruded ARC series. Create unique architectural statements with custom arcs of light in virtually any radii.

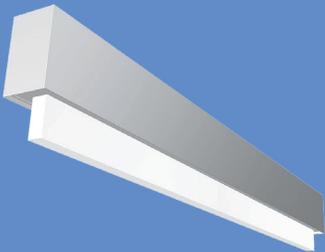

## STYLITE General Illumination

The gently curved shape and wide variety of distribution and lumen packages makes Stylite an ideal choice for classrooms, office spaces, training facilities and similar commercial applications.

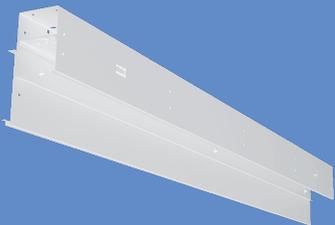

## ATHENA Mini Lite Beam

ATHL-MLB is ideal for applications where a decorative, edge-lit element is desired. 1" optically clear acrylic lens may be laser etched for signage and wayfinding. Recessed, suspended or wall mount.

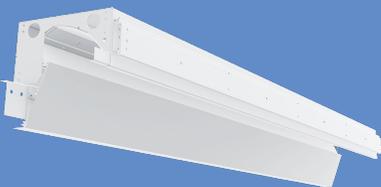

## WPPL-2 Regressed Wall Grazer

Perimeter LED wall grazing luminaire featuring a 2" regressed slot. WPPL-2 features a unique telescoping design for continuous wall-to-wall illumination in both grid and hard plaster ceilings.

## JBL-2 Recessed Wall Washer

The JBL-2 perimeter wall washing system produces diffuse illumination from a completely concealed LED source. JBL-2 may be used in virtually any perimeter application requiring general wall washing.

# PENDANT | TASK | WALL | COVE

## **EQUATOR Large Format Disks**

2', 3' and 4' diameter centerpieces for any large or high-ceilinged interior. May be suspended, wall or surface mounted with either flat or convex lenses. Direct or direct/indirect distributions available.

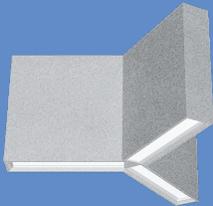

---

## **COMPASS Decorative Rings**

Architectural rings from 2' to 20' in diameter! Compass is ideal for open spaces, lobbies and conference rooms where the design aesthetic is as important as energy efficiency; direct and direct/indirect.

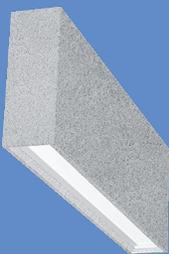

---

## **TRILOGY Decorative Acoustic Pendant**

Trilogy is derived from our Profile extruded product to form a decorative three-winged pendant. Available in 1', 2', and 3' long wing lengths and a variety of acoustic solution offerings.

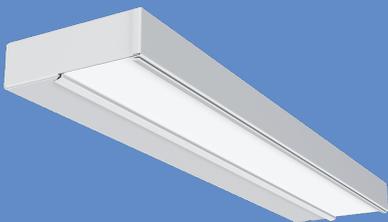

---

## **PROFILE Acoustic Solutions**

Profile extruded linear with acoustic options. 20 colors, 8", 12" or 16" high sound-absorbing panels for all Profile 14, 24 and 44 series in all distributions. Illumination and sound suppression combined.

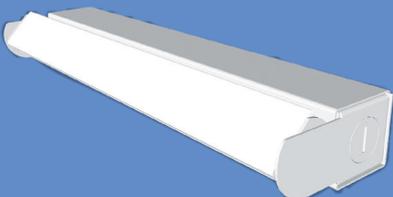

---

## **TSLL Task Light**

TSLL is a simple, effective and efficient LED undercabinet task light for use in offices, schools, and healthcare applications. Optional rocker switch and occupancy sensor available.

---

## **TRPL-13 Adjustable Cove**

Our newest cove luminaire equipped with 90 degrees of aiming adjustability. Locking mechanism prevents "aimed" fixture from shifting out of position due to HVAC and other vibrations.
